Subject: Glyphosate NSRL
Date: Saturday, June 03, 2017 4:32:13 AM

Dear Ms. Barajas,

I request that the Prop 65 NSRL (No Significant Risk Level) for glyphosate must be a validly arrived at NSRL, per CA regulations, SUBSTANTIALLY LOWER than the proposed 1100 micrograms per day, in order for this Safe Harbor to actually be SAFE TO CALIFORNIANS. Until a comprehensive independent study is done, showing REAL LIFE EXPOSURE LEVELS, regulatory authorities should use a NSRL of WELL BELOW 0.0001 micrograms/day, (Thongprakaisang et al., 2013), the level where breast cancer has been detected, in keeping with The Precautionary Principle. Thank you for your consideration...especially for our children!

All the best,
Paul Mallatt
